**Details:**

The Department of Physical Education, Hiralal Bhakat College had been organized a One-day State level Seminar entitled "Awareness on communicable Disease in India, on 18th of Feb2022 at 12:00 noon in room no. 23.

It is a disease resulting from infection capable of being directly or indirectly transmitted from man to man, animal to animal from the environment like through air, dust, soil, water, etc. to man and to animal.

There are many Communicable diseases like AIDS, Small pox , measles, whopping cough, tuberculosis, typhoid, rabies etc.

## **Aim and Objectives :**

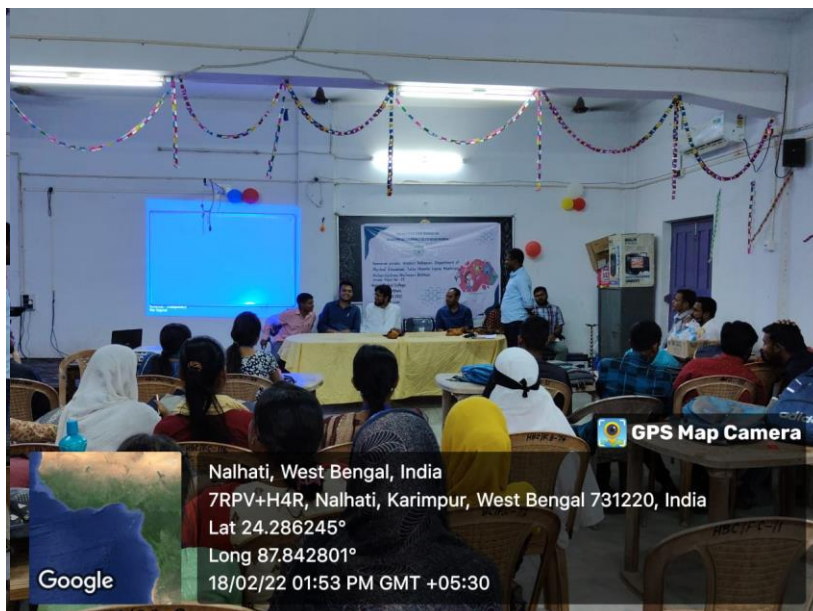

The present study focuses mainly on the following objectives:

1. The aim of the evaluation of communicable diseases surveillance systems is ensuring that communicable diseases monitored efficiently and effectively has an infectious disease, we say that person has been exposed very often, symptoms appear much later so the person never knows when he or she was exposed to the illness that person has become infected.
2. In this study various methods of health promotion for the prevention of the infectious diseases have been identified.
3. The aim of this study is to better define integration in health systems relevant to communicable disease control.
4. A disease is a sickness that occurs there is an upset or breakdown in the way the body usually functions.
5. Diseases that can be passed or transmitted from one person to another are called infectious or contagious, like the common cold. Illness like a heart attack, or cancer are not contagious. If a person is around someone else who.
