

Report of CAMS System

Introduction:

Now-a-days website has become an indispensable interface to represent any academic institution before common public. There is no exception in case of our college also. It acts like a bridge between college and others. To maintain dynamism of a website, efficient software system is urgently required. For this purpose, the college authority has to sign an agreement with ERP software "CAMS 4.0". The agreement was made on 20.03.2020. The contract shall remain valid for the period from 01.04.2022 to 31.03.2025.

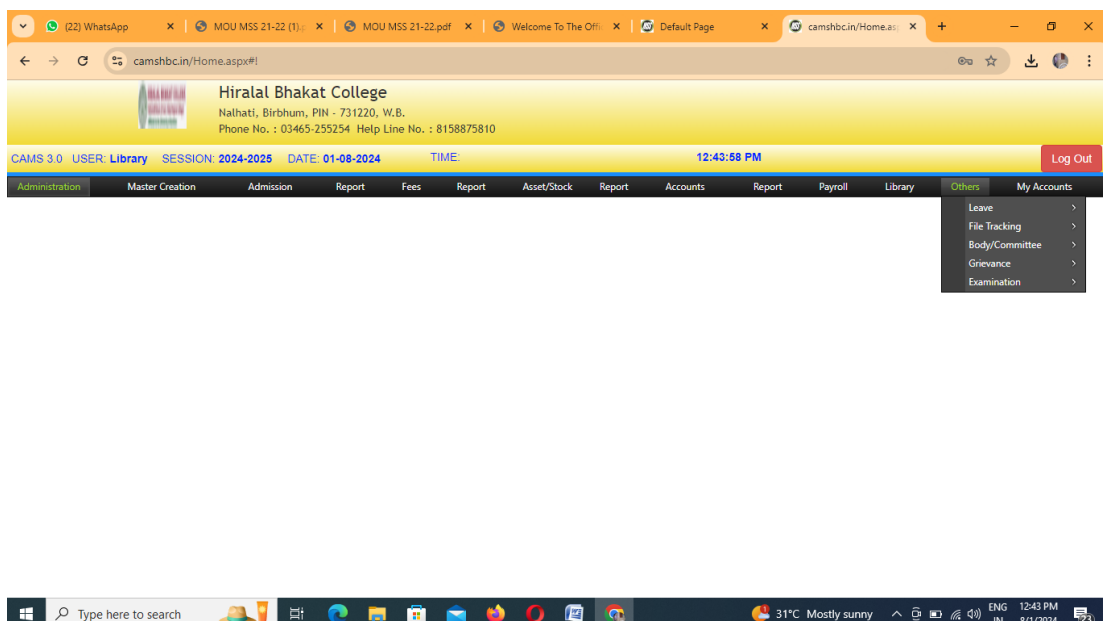

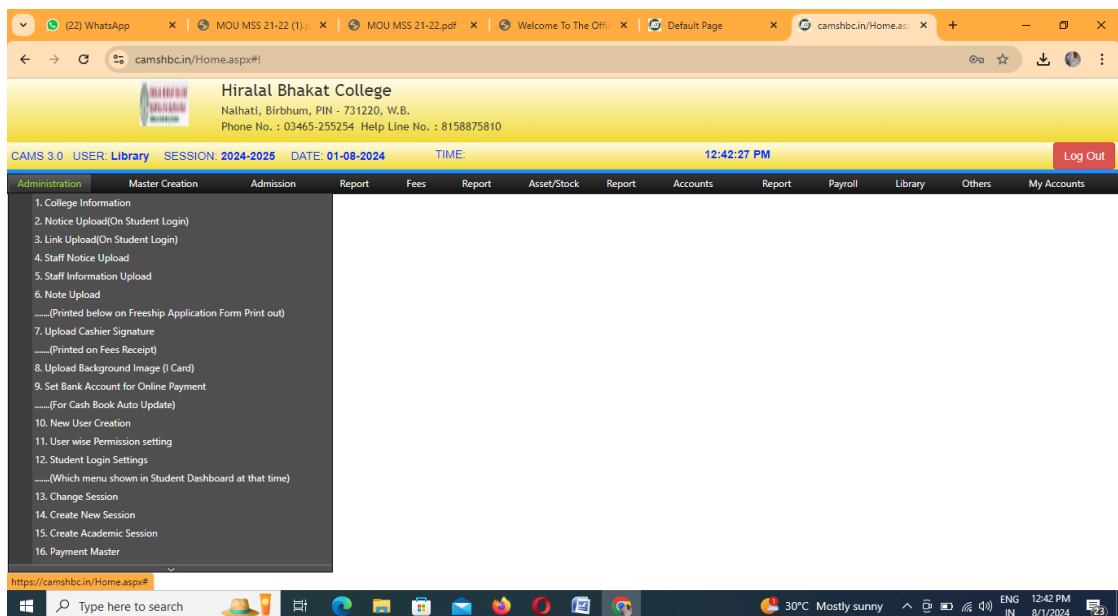

Without such a smart system, it is impossible to deal with administrative, official, financial and library related works without any delay under one umbrella. MSS is a solution to this problem. It has a smart portal to operate, manage and preserve all essential administrative, officials, financial and library related information as well as documents. The following activities are being done with the help of this system.

1. Efficient Admission Portal (CBCS) :- Through this portal, all admission related activities are done smoothly. The individual ids are being generated for each student in meaningful order. The sequence is college code followed by year of admission and unique identification number. All the admission related data are being extracted from the system in excel and other compatible format. The extracted are also uploaded to college website for its smooth operation.
2. Preservation and calculation of the details of collected fees from students:- The system has a module for financial transaction. All the collected fees are accumulated in a systematic way and easily downloaded for its easy retrieval.
3. All administrative related documents are preserved in cloud hosted storage linked with the said System:- Many important office related records are preserved here with much more efficiency. Many other data related to Accounts and Cash section are also available here for its easy retrieval.
4. All payments are managed through a tripartite management system. Initial operations at the end of the Cashier move on to the Accountant and are recommended by the Burser leading to the final approval of the Principal.
5. In case of Library operation, all such common practices which are being done in college library such as acquisition, technical processing, circulation, report generation, barcode printing etc. are being done smoothly. Earlier in the system there was no scope for Journal Entry. Now this provision has been added with this system and many journal entries have been done easily. This is a proof of customization service by the company.

Important Features of CAMS 4.0 System :-

- The Company named as MSS provided all kinds of technical support, maintenance and software up gradation etc.
- The Scope of the work covered comprehensive online maintenance of domain, server and other services related to ERP software.
- The service provider maintained back up service to avoid any deletion of data.
- The college enjoyed 24 hours support for smooth functioning of the ERP software from Service Provider.
- The system had immense scope to customize according to the need of college. The support, behavior of the concerned persons of the company was very good. They were fit for calling, responsive and service oriented at all.
