### 4.3.1 - Institution frequently updates its IT facilities including Wi-Fi

Since in this dynamic environment, usage of computers and availability of internet facilities are playing a pivotal role in Teaching and Learning as well as in management of daily affairs of the institution, the College authority is trying its best in upgrading the IT facilities, including upgrading of Wi-Fi on a regular basis. Moreover, routers have been installed at various places in the campus in order to cater to the needs of both students and College Staff-teaching and non-teaching.

As per the policy of the institution, tenders have been called for purchase of computers, software and other accessories and the one with the lowest rate but satisfactory service record has been chosen after a prolonged consideration in the College Governing Body. Since the state government has made E-pension mandatory, a seamless internet and Wi-Fi service is very much required for uploading and sending the data of the superannuated personnel to the Higher Education Department, Government of West Bengal.
